

## The PACIFIK

The Pacifik is an ultra modern cooler equipped with the latest technology, including hi-flow faucets and a stainless steel water reservoir. Compressor cooled for high capacity refrigeration, this commercial grade bottleless water cooler has an adjustable cold water thermostat for ice cold refreshment and a built-in filtration system, ensuring that your water is clean and great tasting. The exterior is a very strong and durable molded polyethylene, proven to be highly scratch and dent resistant. Bottleless systems are simple to install and are tremendously efficient, offering excellent drinking water at a fraction of the cost of bottled water. It takes only 15 minutes to install using your water line and following our simple step-by-step instructions (no tools required).

### Features

- Designer style durable exterior
- Proprietary high flow water faucets
- Stainless Steel water reservoir
- Optional Hot water with on/off switch
- Built-in long lasting filtration system
- Simple user installation instructions
- Easy to change filters

### Specs

**Temps:** Cold/Cold or Hot/Cold  
**Dimensions:** 11.75 x 13.5 x 58  
**Height:** 58.25"  
**Diameter:** 12 5/16"  
**Power:** 110 volts - 6' cord  
**Vent. Req.:** 2" on all sides  
**Warranty:** 5 YR Refrig. / 1 YR Parts  
**Weight:** 40 lbs

**5 YR  
Warranty**

## ADVANTAGES OF AN AQUAERVE BOTTLELESS COOLER...

- Superior High Quality Drinking Water
- Less labor moving, and storing full and empty bottles
- No more "*running out of water*"
- No heavy bottles to lift - no back injuries
- Better building security - no weekly delivery people
- Simplified and less costly billing administration
- Compact and attractive units
- Better sanitation and maintenance
- **And, Dramatically Reduced Cost !**
  - **Cost Savings Estimate:**  
3 5gallon bottles per week @ \$7 each  
 $3 \times \$7 \times 52 = \$1092/\text{yr}$  (every year!)

## Disadvantages of Bottled Water

- Bottled water can be very expensive. The more you use the higher the cost. Aquaverve's bottleless units have a lower cost that never varies.
- Surveys show that changing the water bottle is one of the least preferred office tasks. A water bottle weighs 42 pounds and each and every day there is an injury and worker comp claim as a result of lifting these bottles.
- Commercial office space is expensive and storage is always at a premium. Bottled water requires significant storage space for full and empty bottles.
- Bottled water typically has weekly or monthly billing resulting in significantly higher administrative cost.
- The World Wildlife Federation estimates that bottled water puts 1.5 million tons of plastic into the environment each year (3,000,000,000 pounds)

**Improve your water,**

**Save money,**

**Help the environment!**

**GO BOTTLELESS!**
