This specification describes a Halsey Taylor product with design, quality, and functional benefits to the user. When making a comparison of other producers' offerings, be certain these features are not overlooked.

Care and Maintenance of Elkay Composite Fountains

The premium composite fountain provides an extremely durable, non-porous surface with resists staining. Care is very simple. Routine cleaning with a soft sponge or cloth, or with water or non-abrasive aerosol foam cleaner, is all that is normally needed to give many years of trouble free service. Cleaners left standing on the fountain surface can dull the surface finish. Be certain to rinse all cleaning agents completely and polish with a soft cloth.

Harsh abrasive cleaners are not required and should not be used.

Mild abrasives such as liquid automotive cleaning compound or baking soda paste will remove simple scratches and stains. Cigarette burns can normally be removed without noticeable effect. Deeper scratcher or gouges can be corrected with fine grit sandpaper (240 grit then 400 grit) or a green scotchbrite™ pad.

To maintain or regain luster and make cleaning easier, periodic applications of automobile wax or like products will keep the finish looking like new.

INSTALLER NOTE

This drinking fountain is furnished with a bubbler and valve including all connecting fittings which are manufactured of completely lead free material. Shut off valve (not furnished) to accept 3/8" O.D. unplated copper tube.

OPERATION OF QUICK CONNECT FITTINGS
